

Style with Substance

Dolce Mia Luxe Bath & Body is proud to introduce travel size bath amenities made with healthy, natural ingredients to gently cleanse, moisturize, and protect the skin. Using only the highest quality ingredients, Dolce Mia bath amenities contain olive oil and aloe to smooth and soften the skin, and Shea butter to promote anti-oxidant protection and moisture.

Hypo-allergenic, safe for sensitive skin, and biodegradable, our products are an environmentally friendly alternative with Castile and glycerin based shampoos, conditioners, soaps, and hand cleansers.

Our Ingredients

Castile: Castile soap is a type of soap made exclusively from vegetable oils rather than animal fat or synthetic substances. In our castile soap, we use a combination of extra virgin olive oil and coconut oils to create a soap that cleans effectively without being aggressive - a soap that leaves the skin silky-smooth and refreshed. Our products have a high level of glycerin with no sulfates, surfactants or detergents to gently cleanse the skin.

Glycerin: A natural humectant, glycerin attracts moisture to the skin. Glycerin soaps are known to have a mild ph and are gentle, moisturizing and softening. Soap made with high glycerin contents is especially good for sensitive and delicate skin, and for children.

Shea Butter: Shea butter moisturizes the skin, penetrating deeply to deliver valuable nutrients. The moisturizers in Shea butter are the same as those produced by the sebaceous glands of the skin. Because its structure and function resembles that of the lipid content of skin, Shea butter is considered to be a Natural Moisturizing Factor (NMF). It also works as an anti-inflammatory, helping to soothe itchy, irritated or sunburned skin.

No Unnecessary Additives: We stay as close to natural as possible using the highest quality soap ingredients and avoiding unnecessary additives. For example, we do not use sodium lauryl sulfate or detergents in our body wash and bar soap. Dolce Mia products lather up beautifully on their own, so we would never want to add an ingredient that literally strips away the benefits of our soap. What we put into our soap is just as important as what we leave out. We use ingredients such as olive oil, Shea butter and lots of glycerin to gently cleanse, moisturize and protect skin.

Instant Hand Cleanser: Imagine a waterless hand cleanser that is not only convenient and effective, but also leaves your hands soft and smelling great. Dolce Mia's Instant Hand Cleanser contains aloe for moisturizing, alcohol for sanitizing, and a beautiful design – for pure pleasure. You'll find yourself pulling it out just to show your friends. They'll fall doubly in love when they try it. Also with organic botanicals. Not tested on animals.

Lotion: Dolce Mia offers a thick and creamy Shea butter body lotion that is infused with organic botanical extracts, vitamin E, almond and sunflower oil and Dolce Mia's signature fragrance blends, made with natural oils. Our lotion absorbs quickly to quench, soothe and repair parched skin.

Organic Botanicals: Our lotion contains the following organic botanical extracts, which benefit the skin in a multitude of ways:

- **Sweet Almond Oil:** Softens and protects skin, helping to balance water loss and support the absorption of moisture.
- **Chamomile Extract:** Soothes skin.
- **Red Clover:** Valued for its anti-inflammatory, antioxidant, and calming, cleansing and demulcent properties.
- **Marsh Mallow Root:** Helps with chapped skin, may be an anti-inflammatory.
- **Oat Kernel Extract:** Provides anti-inflammatory, anti-oxidant and anti-itch benefits.
- **Sunflower Seed Oil:** A natural antioxidant that provides excellent emollients.
- **Calendula Officinalis Flower:** The common Marigold. The flavonoids and saponins contained in extracts of the plant have been shown to not only promote skin healing and repair, but also significantly reduce inflammations. Anti-inflammatory, antiseptic, soothing and healing. Stimulates cellular regeneration.
- **White Tea Extract:** Flavonoids contained in Red, White & Green Tea present veinotonic properties. They reduce capillary permeability and increase blood capillary resistance, consequently improving tissue irrigation & skin condition.
- **Lavender:** Lavender essential oil is adrogenic in nature, meaning that it normalizes both dry and oily conditions of the skin. Anti-microbial, anti-inflammatory, and skin regenerative, it is also great for sensitive or mature skin.

- **Comfrey:** Traditionally used to heal damaged skin, ulcers and chapped skin. The healing power of Comfrey is mainly due to one of its active ingredients - allantoin - a powerful cell proliferator.
- **Vitamin E:** Derived from wheat germ and/or vegetable oils. It heals, rejuvenates, softens, soothes and protects the skin.

Fragrances

In the vast market of over perfumed, artificial and predictable smelling products, ours stands apart with unique fragrances that are rich and deep without being overpowering. Enriched with essential oils, our fragrances are custom blended, and made exclusively for Dolce Mia.

Mango Tangerine: This fruity and refreshing scent could stir up an appetite. A delicious and fruity aroma, the pure, fragrant mango and tangerine are perfectly balanced—full of complex flavor with a tangerine high note and just sweet enough.

Tropical Citrus: A rich undercurrent defines this luscious scent of fruit and flowers. Citrus high notes emphasize freshness, with a hint of coconut to ground our scent in the tropics. It's a fresh take on the tropical beach smells we associate with summer.

Terra Verbena: This clean outdoorsy scent emanates elements of freshly chopped wood, new leather and lemon verbena. Calming, bold and inspiring, it speaks to those who love a fresh and confident cleanse.

“Green” as a Lifestyle

For us, being “green” means simply using recipes and ingredients that were developed before the industrial and chemical revolutions – using ingredients that are pure and locally procured, when possible, and keeping production within our local economy. Green is not a marketing tool for us, we just happened to have embraced a lifestyle and business philosophy that falls within the definition of “being green.”

Natural. Beautiful. Luxurious.

Dolce Mia proudly employs people with disabilities.
